

PRESS RELEASE

“DMT Best Partner Award” for Eppinger

The expert for tool holders and gear units awarded as best supplier

Denkendorf, April 22, 2020 - Eppinger shows once again what an innovative collaboration between companies and their suppliers can look like: The Swabian company received the “DMT Best Partner Award” in April 2020 for its exemplary solution competence. And those who receive this award can count themselves among the best in their field.

For many years, the international machine tool manufacturer Doosan Machine Tools has successfully used the high-quality tool holders and cycloidal gear units from Eppinger, some of which were specially developed for Doosan.

With this award, Doosan honors its best suppliers for excellent performance in the manufacture and delivery of products or services - especially in the areas of quality, costs, innovations and logistics.

Eppinger has been supporting the machine tool builder for 20 years and has always been able to convince with its quality products and reliable delivery performance.

Today, companies demand more from their suppliers than simply providing products. It's about individual use and making existing processes even better.

Eppinger offers individual and end-to-end solutions from a single source, from development and design to production.

Numerous national and international companies such as Doosan benefit from the supplier's high level of innovation. "With our individual developments for, but also in cooperation with Doosan, we have meanwhile been able to set a world standard in terms of tool interface", claims the sales manager and authorised representative of Eppinger, Joel Judas. "We try to provide our customers with efficient solutions to improve their processes and applications individually".

And here is another advantage. Eppinger offers a wide range of products and services from a single source. The company provides its customers with solutions around the tool holders as well as from the gear range. The complete know-how bundled from one source. A great benefit for the customer, but also for Doosan.

For Doosan, the supplier Eppinger has long ceased to be a pure parts supplier, but at the same time a development and innovation partner that contributes to Doosan's competitiveness.

The managing partner Uwe Eppinger, at Doosan Machine Tools' headquarters in Korea, will accept the award.

The award ceremony was postponed for the time being because of the Corona crisis.

About the company:

The Eppinger Group is a medium-sized, family-owned company based in Denkendorf / Baden-Württemberg. The company has been specializing in precision tools for lathes for almost 100 years and is a leader in the design and manufacture of tool holders for CNC Turning & Milling Centres.

The product range includes fixed and driven tool holders and complete tool systems.

Another competence is the development of rotary tables.
